

MADHAVAN SRAJAN GUPTA

Software Developer

@ madhvan02@gmail.com, +91 6267020925 www.linkedin.com/in/msg17 Pune, India

SUMMARY

Passionate and results-driven Android Software Developer with 2 years of hands-on experience designing, developing, testing, and deploying innovative mobile applications. Proficient in Kotlin and Java with deep expertise in Android SDK, modern UI/UX principles, and agile development methodologies. Adept at collaborating with cross-functional teams to deliver robust, high-performance apps that enhance user engagement and drive business growth.

EXPERIENCE

Software Developer

Visteon 08/2023 - Present Pune, India

- Led the design and implementation of a new Android application feature that was integrated in the Visteon End of Line production.
- Integrated Firebase services for real-time data synchronization and push notifications, improving user retention.
- Developed and maintained server-side APIs to enhance mobile application performance, reducing latency by 40%.
- Integrated RESTful APIs using Retrofit to ensure seamless data exchange and real-time updates.
- Enhanced app performance by optimizing code and implementing thorough testing (unit tests with JUnit, UI tests with Espresso), resulting in a 20% decrease in crash reports.
- Managed project timelines and coordinated with stakeholders to ensure on-time delivery of major app updates.

Data Engineer Intern

AB InBev 01/2023 - 08/2023 Bangalore, India

- Designed and implemented distributed ETL pipelines using Apache Spark and PySpark to process multi-terabyte datasets.
- Applied advanced SQL techniques to transform raw data into a structured format within a data warehouse environment, enhancing query performance and reliability.
- Implemented comprehensive data validation and cleansing routines using PySpark DataFrame API and Pandas, enforcing strict schema controls.
- Tuned Spark configurations and optimized cluster performance on cloud platforms (e.g., AWS EMR, Databricks) to maximize throughput and minimize latency.
- Integrated data streams from REST APIs, relational databases, and Apache Kafka, ensuring seamless, real-time data flow into the centralized data lake.

Android Application Developer Intern

FPL Capital 08/2022 - 12/2022 Remote

- Collaborated with senior developers to design and implement new features for the company's flagship Android application using Java.
- Integrated RESTful APIs using Retrofit and OkHttp, facilitating smooth data exchange between the mobile app and backend services.
- Participated in agile development practices, including daily stand-ups and sprint planning, contributing ideas and feedback that improved overall project efficiency.
- Conducted debugging and testing using JUnit and Espresso, which resulted in a 15% reduction in reported bugs.

KEY ACHIEVEMENTS

Innovative Feature Development

Led the development of a real-time data synchronization feature using Firebase, improving data consistency and boosting user retention by 15%.

Reduced App Latency

Successfully reduced app crash rates by 15% through proactive performance optimizations and rigorous testing.

High-Profile Project Delivery

Successfully delivered a complex, high-impact project ahead of schedule, which was later recognized by management as a key factor in exceeding quarterly KPIs.

Team Work

Excellent communication and teamwork abilities, with a commitment to agile methodologies. Passionate about staying current with emerging mobile technologies and industry trends.

SKILLS

Java • Android Studio • SQLite •

Firebase Realtime Database • Firestore •

Mockito • JUnit5 • MySQL • PySpark • RDMS •

Python • Android SDK •

Mobile Application Development •

API Development • Agile Methodologies

CERTIFICATION

Android Development with Java

Udemy Course on Android application development using Java framework.

Scientific Computing with Python

FreeCodeCamp Learning course on computing and development in Python.

EDUCATION

B.Tech in Computer Science and Engineering

Vellore Institute of Technology

05/2019 - 06/2023 India
